

```

1 import java.util.Scanner;
2 public class ArmstrongNumber{
3     public static void main(String[]args){
4         Scanner sc=new Scanner(System.in);
5         System.out.print("Enter a number: ");
6         int num=sc.nextInt();
7         int original=num;
8         int sum=0;
9         int digits=0;
10        int temp=num;
11        while(temp!=0){
12            digits++;
13            temp=temp/10;
14        }
15        temp=num;
16        while(temp!=0){
17            int digit=temp%10;
18            sum+=Math.pow(digit,digits);
19            temp=temp/10;
20        }
21        if(sum==original){
22            System.out.println(original+"is a Armstrong number.");
23        }else{
24            System.out.println(original+"is not an armstrong number.");
25        }
26        sc.close();
27    }
28 }

```

Enter a number: 153is a Armstrong number.
