

```
1 import java.util.Scanner;
2 public class DecimalToBinary{
3     public static void main(String[]args){
4         Scanner sc=new Scanner(System.in);
5         System.out.print("enter a decimal number: ");
6         int decimal = sc.nextInt();
7         int binary=0;
8         int place=1;
9         while(decimal>0){
10             int remainder=decimal%2;
11             binary=binary+(remainder*place);
12             decimal=decimal/2;
13             place=place*10;
14         }
15         System.out.println("Binary number: "+binary);
16         sc.close();
17     }
18 }
```

```
enter a decimal number: Binary number: 1101
```
