

```
1 import java.util.Scanner;
2 public class SphereVolume{
3     public static void main(String[]args){
4         Scanner sc=new Scanner(System.in);
5         System.out.print("Enter the radius of the sphere: ");
6         double radius=sc.nextDouble();
7         double volume=(4.0/3.0)*Math.PI*radius*radius*radius;
8         System.out.println("Volume of the sphere="+volume);
9         sc.close();
10    }
11 }
```

Enter the radius of the sphere: Volume of the sphere=113.09733552923255
