

```
1 import java.util.Scanner;
2 public class ProductofDigits{
3     public static void main(String[]args){
4         Scanner sc=new Scanner(System.in);
5         System.out.print("Enter a number: ");
6         int num=sc.nextInt();
7         int product=1;
8         while(num>0){
9             int digit=num%10;
10            product=product*digit;
11            num=num/10;
12        }
13        System.out.println("product of digits= "+product);
14        sc.close();
15    }
16 }
```

Enter a number: product of digits= 24
